## GELATO DUOLUX

### Data

21x20x22 cm  
5 Kg  
220V-240V 50Hz/1 - 15W

### Production

2x700g (2x1l.) – 20/30 min  
Inner bowl in 18/10 stainless steel

Ice cream is good and it's healthy!

The Duo Lux has a new small and compact design that allows to save space. It is easy to use and clean thanks to the full stainless steel bowl.

In 20-30 minutes it produces gelato for 5/7 people (700 gr.) For each bowl, therefore a total of 1.40 kg.

The bowl is high 14cm, designed to fit into most drawer freezers.

Equipped with non-slip feet for better stability during operation. The transparent lid makes it easy to check the level of preparation, without the need to open it.

Cold accumulation gelato machine with hermetically sealed double-walled container. Inside the two sealed walls, there is a cryogenic liquid (developed by nemox) which has the function of accumulating cold when the bowl is in the freezer and a slow

release during the preparation of gelato. Mixing with electric motor.

It produces gelato, sorbets, frozen yogurt. Ideal for instant cooling of any type of drink.

The bowl has an elegant design and can be brought to the table as an ice basket or bottle cooler. The frozen bowl maintains a temperature of -10 °C for about 2 hours.

The internal stainless steel bowl guarantees perfect hygiene and resistance over time. Absolutely scratchproof !

The lid has a wide opening for pouring or adding ingredients.

Before using the machine, put the bowl in the freezer, allowing the liquid sealed inside to freeze and activate the cold function. Do not put anything inside the bowl and do not cover it (never place the bowl in the freezer if it is still wet).

Materiale contenitore interno Inner bowl material	18/10 stainless steel

The freezer must be adjusted to at least reach -18°C. The bowl must remain in the freezer for at least 9/12 hours. The bowl can be left constantly in the freezer so that it can be used when necessary.

When you want to make gelato, remove the bowl from the freezer, assemble the lid with the pin, the blade and the motor. Hook the motor-lid unit to the bowl, making sure it is well fixed.

Start the movement of the blade by turning on the motor, slowly pour the ingredients (700g for each bowl) through the hole in the lid. Do not fill the container more than half full.

During the preparation, you can add through the lid opening: Granules, chocolate and other ingredients.

When the gelato is ready, turn off the motor, remove the lid with the paddle and serve.

The gelato can be stored covered in the same bowl for about 30 minutes, or you can also put the covered bowl in the refrigerator for about 30 minutes. It is also possible to keep the gelato (limited) in the freezer.

Do not put any part of the machine in the dishwasher and do not heat the freezer bowl.

Being a sealed container, it could break causing harm to people. Do not scrape the inside of the bowl

We will be able to amaze our guests with a personalized gelato every time according to their tastes and we can serve our children a safe, genuine and healthy snack, made with controlled ingredients, involving them too in the preparation, to spend a fun and sweet moment together!

Making snacks and desserts at home has never been so easy!
